What is old

The image displays two overlapping windows of the Irssi chat client. The top window shows a code editor with JavaScript code for an IRC bot. The bottom window shows the chat interface with a list of channels on the left and a chat log on the right. A context menu is open over the chat log, showing options like 'Op', 'DCC', 'CTCP', 'Whois', and 'Query'. The chat log contains messages from users like 'miu', 'ahf', and 'SS3'.

IRC for the 21st century. <http://www.glowing-bear.org> for the stable version, <https://latest.glowing-bear.org> for the dev |  

Search 135255 <+lorenzh> ah that was the same commit, sorry for duplicate bugging
135331  - roniezh [roniezh@k-lined.info] has joined #glowing-bear
135344 <Nei> this is the similar variant with polling
135358 <Nei> it is different in parts from the pr which is trying to use onload
135416 <Nei> of course it would have the same nitpicks in the identical parts
135944 <+lorenzh> ah, ok
135947 <+lorenzh> sorry
140116 <Nei> it's an alternative to the pr
140128 <Nei> the desired end result is supposed to be similar
140141 <Nei> (making sure the buffer sticks at the bottom)
140234 <+lorenzh> OK, I don't know enough about JS scrolling things to be the judge to which one is better
140347 <Nei> as I said the onload has the above disadvantage
140352 <Nei> but I dont know about polling perf

144000 <+xt> I just tested gb on IE11 mobile
144002 <+xt> didn't wor
144005 <+xt> just get connection error
144006 <+xt> :(
144511 <+lorenzh> :(
144523 <+xt> I can see in relay log it does connect atleast
144538 <+xt> might be there's some slight differences in their websocket, just like IE11 desktop had
144543 <+lorenzh> eww

Web!

The screenshot shows a Mozilla Firefox browser window with several tabs open. The active tab is 'Demoscient' displaying a chat interface. The chat window has a dark background with white text. On the left side of the chat area, there is a graphical representation of a bear's face, rendered in a dashed-line style. The main area of the chat window contains IRC messages from various users, including 'meicelli', 'gusnan', 'disscofee', 'dormier', and 'Spaceball'. The messages discuss the latest version of the 'glowing-bear' chat client and its features. The browser's address bar shows '127.0.0.1:8585/demo.html'. The browser's developer tools are open at the bottom, showing the 'Console' tab with several error messages related to 'Spaceball' and 'mei'.

Mobile?

Issues

- Overhaul Networking code, IPv6, TOR, Proxies
- Separate Client Core from IRC Core
- (Rewrite) Text FrontEnd
 - Vertical elements
 - Dynamic themeing
 - Line meta-data
 - Proper “\$expandos” (like ircll)
 - Multiple windows (like ircll)
- Maintaining Python / XMPP, XMPP+OTR?
- Integrate more protocols?
- Make Irssi a viewer client to itself

Thanks

Anti Assembly (next to Gentoo and CoreOS)
